METALLURGIA

THE BRITISH JOURNAL OF METALS

Index to Vol. XVIII.

May, 1938—October, 1938.

KENNEDY PRESS LIMITED
21, Albion Street
GAYTHORN, MANCHESTER 1

INDEX

A

A New Electric Heat-Treatment Furnace 8
Aluminium Industry, Cartellisation in the World. Part IV. By R. J. Anderson, D.Sc. 23–25
Application of Time Study to Rolling Mills, The 31–32
Aircraft Construction, Metallurgy and 49
Aircraft Industry, The Inspection of Raw Materials in the. By H. H. Jackson 51–54
Aircraft Construction, Materials of. 55–59
Atmospheres, Comparative Effects of Controlled 60
Aluminium Industry, Cartellisation in the World. Part V. By R. J. Anderson, D.Sc. 65–66
Aluminium Output. Long-Term Growth of World. By R. J. Anderson, D.Sc. 87–90
Aluminium, Motor Lorry Bodies in 115–116
Alloys, Cavitation Erosion of Metals and 117–118
Aluminium and Its Alloys for Microscopical Examination, The Preparation of. By George Mann 121–122
American Society for Testing Materials 129–131
Alloys, Heat-Treatment of Copper-Silicon Ferrous 133–134
Aluminium-Bromide. By C. C. Downie..... 134
Adherent Nickel Plating. By E. E. Halls.....139–140
Aluminium as a Surface Protection for Steel 144
Alloys and Plain Carbon Steels. Effect of Carbon on the Critical Cooling Rate of High Purity Iron-Carbon 146
America, Institutes Joint Meetings in 149
Allegheny Steel Co., The.....163–183
American Steel and Wire Co. .163–183
Applications of High-strength Aluminium Casting Alloys, Some. By a Special Contributor....191–193
Aluminium, The Properties of High Purity 193–194
A System for the Investigation of the Mechanical Properties of Cast Iron. By J. E. Hurst 197–200
Applications of Hot-Face Insulating Bricks, Practical. By J. W. Dawson 206–208
Arc Welding, Progress in Electric 211–212

B

Bellahouston, Palace of Engineering at 1–6
British Foundrymen, Institute of 71–74
Britain, Some Recent Developments in the Iron and Steel Industry in. By A. McCance, D.Sc. and T. W. Hand 97–98
Bodies in Aluminium, Motor Lorry 115–116
British Trade, Factors Affecting.. 119
Bromide, Aluminium. By C. C. Downie..... 134
Brass-Plated Steel, Cold Rolling Tests on Nickel, Copper and.... 140
Buffalo 153–160
Bell Telephone Laboratories 164
Boston 183–186
Bricks, Practical Applications of Hot-face Insulating. By J. W. Dawson 206–208

C

Corrosion, Oxygen Pressure Related to Steel 18
Cartellisation in the World Aluminium Industry. Part IV. By R. J. Anderson, D.Sc. 23–25
Canada, New Gold Milling Plants in 25
Chemical Industry Conference, The 32
Construction, Metallurgy and Aircraft 49
Corrosion Committee, Fifth Report of the 50
Construction, Materials of Aircraft. 55–59
Comparative Effects of Controlled Atmospheres 60
Cartellisation in the World Aluminium Industry. Part V. By R. J. Anderson, D.Sc. 65–66
Construction and Design, Rolling Mill 81–83
Causes of Porosity in Electro-Deposited Nickel on Steel..... 83
Canadian Copper Production in 1937 84
Conversion of Metals, The 85
Contributions of Metallurgy to Engineering Progress, Some...91–94
Corrosion Problems in the Sulphate Pulp Mill 111
Cavitation Erosion of Metals and Alloys 117–118
Canadian Radium and Uranium... 120
Copper-Silicon Ferrous Alloys, Heat-Treatment of 133–134
Cooling Speed on the Transformation of Steel, Influence of the.... 136
Centrifugal Oil Purifiers, Small.... 136
Cold-Rolling Tests on Nickel, Copper and Brass-Plated Steels 140
Carbon on the Critical Cooling Rate of High-Purity Iron-Carbon Alloys and Plain Carbon Steels, Effect of 146
Canadian Copper Refiners Ltd. ... 153–160
Canadian Steel Foundries Ltd...153–160
Canadian Westinghouse Co. .. 153–160
Cleveland 163–183
Carnegie-Illinois Corporation ..163–183
Chicago 183–186
Casting Alloys, Some Applications of High-strength Aluminium. By a Special Contributor.....191–193
Cast Iron, A System for the Investigation of the Mechanical Properties of. By J. E. Hurst.. 197–200
Control, Industrial Management and Production. By F. L. Meyenberg 201–203
Chemical Engineering, The Trend of 209–210
Creep of Metals under Static and Repeated Stresses, The 213–214
Corrosion and Erosion in River Structures, Reducing 215–216
Copper Refinery, The Nkana. By A. E. Wheeler and H. Y. Eagle 219–221

D

Diagram for Mild Steel, The Stress-Strain. By G. Welter and S. Gockowski 13–17
Diagram of Mild Steel, Some Fundamental Factors Regarding the Stress-Strain. By G. Welter and S. Gockowski 61–64
Developments at Jarrow 67–68
Design, Rolling Mill Construction and 81–83
Deutsche Gesselschaft fur Metallkune 86
Developments in Electrode Materials, Resistance Welding and. By P. Mabb 95–96
Developments in the Iron and Steel Industry in Britain, Some Recent. By A. McCance, D.Sc. and T. W. Hand 97–98
Diagram for Mild Steel, Some Fundamental Factors Regarding the Stress-Strain. By G. Welter and S. Gockowski 99–101
Diesel Engine Metals. By R. W. Maughan, M.I.M.E., M.I.C.E..123–124
Detroit 163–183

E

Engineering at Bellahouston, The Palace of 1–6
Empire Exhibition, The 7
Electric Heat-Treatment Furnace, A New 8
Elements, Some "Rare" 17–18
Effects of Controlled Atmospheres, Comparative 60
Electro-Deposited Nickel on Steel, Causes of Porosity in..... 83
Engineering Progress, Some Contributions of Metallurgy to ...91–94
Electrode Materials, Resistance Welding and Developments in. By P. Mabb 95–96
Economisers, Steel Tube 106
Erosion of Metals and Alloys, Cavitation 117–118
Engine Metals, Diesel. By R. W. Maughan, M.I.M.E., M.I.C.E. 123–124
Engines, Producing Small Vertical Oil.....134–136
Equipment of Wire Rope Works 131–132
Electrical Works, Mining Engineers Visit 135
Effect of Carbon on the Critical Cooling Rate of High-Purity Iron-Carbon Alloys and Plain Carbon Steels 146
Engineering, The Trend of Chemical 209–210
Electric Arc Welding, Progress in 211–212
Erosion in River Structures, Reducing Corrosion and 215–216

F

Furnace, A New Electric Heat Treatment 8
Fifth Report of the Corrosion Committee 50
Factors Regarding the Stress-Strain Diagram of Mild Steel, Some Fundamental. By G. Welter and S. Gockowski 61–64
Foundrymen, Institute of British. 71–74
Fundamental Factors Regarding the Stress-strain Diagram for Mild Steel, Some. By G. Welter and S. Gockowski.....99–101
Ferrous Metallurgy in Soviet Russia. By a Special Correspondent..101–102

Page

Factors Affecting British Trade... 119
Fatigue Testing of Steel Wires under Varying Tensile Strength 132
Ferrous Alloys, Heat-Treatment of Copper-Silicon.....133–134

G

Gold Milling Plants in Canada, New 25
Great Britain, Steelmaking in.....33–37
George Kent's Centenary 47–48
Growth of World Aluminium Output. Long-Term. By R. J. Anderson, D.Sc. 87–90
Geological Development in U.S.S.R. By Prof. N. N. Gornostayev 127–128

H

Heat-Treatment Furnace, A New Electric 8
Heat-Treatment and Manipulation of 18/8 Stainless Steel, The. By L. Sanderson 11–12
Heat-Treatment of Copper-Silicon Ferrous Alloys 133–134
High-Purity Iron-Carbon Alloys and Plain Carbon Steels, Effect of Carbon on the Critical Cooling Rate of 146
High Strength Aluminium Casting Alloys. Some Application of. By a Special Contributor 191–193
High Purity Aluminium, The Properties of 193–194
Hot-Face Insulating Bricks, Practical Applications of. By J. W. Dawson 206–208

I

Industries, The Scottish Metallurgical. By J. W. Donaldson, D.Sc..9–11
Iron and Steel Institute Annual Meeting 19–22
Improvements at South Durham Iron and Steelworks 26–30
Industry Conference, The Chemical 32
Inspection of Raw Materials in the Aircraft Industry, The. By H. H. Jackson 51–54
Institute of British Foundrymen..71–74
Iron and Steel Industry in Britain, Some Recent Developments in the. By A. McCance, D.Sc. and T. W. Hand 97–98
Influence of the Cooling Speed on the Transformation of Steel.... 136
Information on Tin, Technical.... 136
Iron-Carbon Alloys and Plain Carbon Steels, Effect of Carbon on the Critical Cooling Rate of High-Purity 146
Institutes Joint Meetings in America. (These Meetings were cancelled at the last minute, but as the issue was ready for despatch, it was published) 149
Foreword on the American visit by the Rt. Hon. the Earl of Dudley, M.C., President of British Iron and Steel Institute; Dr. C. H. Desch, F.R.S., President of British Institute of Metals; Mr. T. M. Girdler, President of American Iron and Steel Institute; Mr. Daniel C. Jackling, President of American Institute of Mining and Metallurgical Engineers; and Professor G. B. Waterhouse, President of American Society for Metals 150–152
Visit to Canada and United States of America by British Institutes 153–186
Canada to New York 153–160
International Nickel Co. of Canada 153–160
Visit to New York 161–163
Tour in United States of America 163–183
International Nickel Co. Inc..163–183
International Silver Co. 163–183
Inland Steel Co. 183–186
Industrial Management 195
Institutes Autumn Meeting..... 196
Investigation of the Mechanical Properties of Cast Iron, A System for the. By J. E. Hurst.....197–200
Industrial Management and Production Control. By F. L. Meyenberg 201–203
Insulating Bricks, Practical Applications Hot-face. By J. W. Dawson 206–208

J

Jarrow, Developments at 67–68
Jones and Laughlin Steel Corporation 163–183

K

Kent's Centenary, George 47–48

L

Long-Term Growth of World Aluminium Output. By Robert J. Anderson, D.Sc. 87–90
Lorry Bodies in Aluminium, Motor 115–116
Laboratories of the Aluminium Co. of America 163–183

M

Metallurgical Industries, The Scottish. By J. W. Donaldson, D.Sc..9–11
Manipulation of 18/8 Stainless Steel, The Heat-Treatment and. By L. Sanderson 11–12
Mild Steel, The Stress-Strain Diagram for. By G. Welter and S. Gockowski 13–17
Milling Plants in Canada, New Gold 25
Mills, The Application of Time Study to, Rolling 31–32
Motor Car Production 43–47
Metallurgy and Aircraft Construction 49
Materials in the Aircraft Industry, The Inspection of Raw. By H. H. Jackson 51–54
Materials of Aircraft Construction..55–59
Mild Steel, Some Fundamental Factors Regarding the Stress-Strain Diagram of. By G. Welter and S. Gockowski 61–64
Metals, The Conservation of..... 85
Metallurgy to Engineering Progress, Some Contributions of 91–94
Mild Steel, Some Fundamental Factors Regarding the Stress-Strain Diagram for. By G. Welter and S. Gockowski 99–101
Metallurgy In Soviet Russia, Ferrous. By a Special Correspondent 101–102
Motor Lorry Bodies in Aluminium 115–116
Metals and Alloys, Cavitation Erosion of 117–118
Microscopical Examination, The Preparation of Aluminium and its Alloys for. By George Mann.121–122
Metals, Diesel Engine. By R. W. Maugham, M.I.M.E., M.I.C.E. 123–124
Materials, American Society for Testing 129–131
Mining Engineers Visit Electrical Works 135
Montreal 153–160
Mechanical Properties of Cast Iron, A System for the Investigation of the. By J. E. Hurst 197–200
Measurement of Temperature, The. By E. C. Rollason, M.Sc. 203–205
Metals under Static and Repeated Stresses, The Creep of.....213–214

N

New Electric Heat-Treatment Furnace, A 8
New Gold Milling Plants in Canada 25
Nickel on Steel, Causes of Porosity in Electro-Deposited 83
National Physical Laboratory, The 107–108
Nickel Plating, Adherent. By E. E. Halls.....139–140
Nickel-Copper, and Brass-Plated Steel, Cold-Rolling Tests on.... 140
Niagara Falls (Ontario) 153–160
Niagara Falls (New York) 153–160
National Research Laboratories of Canada 153–160
New York City 161–163
Naugatuck Valley 163–183
Nkana Copper Refinery, The. By A. E. Wheeler and H. Y. Eagle 219–221
New York World's Fair, The Official Participation of the United Kingdom in the 224

O

Oxygen Pressure Related to Steel Corrosion 18
Output, Long-Term Growth of World Aluminium. By R. J. Anderson, D.Sc. 87–90
Oil Engines, Producing Small Vertical 134–136
Oil Purifiers, Small Centrifugal.... 136
Ottawa 153–160

P

Palace of Engineering at Bellahouston, The 1–6
Production, Motor-Car 43–47
Porosity in Electro-Deposited Nickel on Steel, Causes of 83
Problems in the Sulphate Pulp Mill, Corrosion 111
Preparation of Aluminium and Its Alloys for Microscopical Examination. By George Mann.....121–122
Producing Small Vertical Oil Engines 134–136
Purifiers, Small Centrifugal Oil.... 136
Plating, Adherent Nickel. By E. E. Halls.....139–140
Protection for Steel, Aluminium as a Surface 144
Plain Carbon Steels, Effect of Carbon on the Critical Cooling Rate of High-Purity Iron Carbon Alloys and 146
Pittsburgh 163–183
Pittsburgh Steel Co. 163–183
Properties of High Purity Aluminium, The 191–193
Properties of Cast Iron, A System for the Investigation of the Mechanical. By J. E. Hurst.197–200
Production Control, Industrial Management and. By F. L. Meyenberg 201–203
Practical Applications of Hot-face Insulating Bricks. By J. W. Dawson 206–208
Progress in Electric Arc Welding 211–212
Participation of the United Kingdom in the New York World's Fair, Official 224

Q

Quebec 153–160

R

"Rare" Elements, Some 17–18
Rolling Mills, The Application of Time Study to 31–32
Report of the Corrosion Committee, Fifth 50
Raw Materials in the Aircraft Industry, The Inspection of. By H. H. Jackson 51–54
Rolling Mill Construction and Design 81–83
Resistance Welding and Developments in Electrode Materials. By P. Mabb 95–96
Recent Developments in the Iron and Steel Industry in Britain, Some. By A. McCance, D.Sc. and T. W. Hand.....97–98
Russia, Ferrous Metallurgy in Soviet. By a Special Correspondent 101–102
Radium and Uranium, Canadian.. 120

Page

Rope Works, Equipment of Wire 131–132
Rope Stress Limits, Wire. By Richard Saxton 143
Raritan Copper Works, The 163–183
Republic Steel Corporation ...163–183
Reducing Corrosion and Erosion in River Structures 215–216

S

Scottish Metallurgical Industries, The. By J. W. Donaldson, D.Sc..9–11
Stainless Steel, The Heat-treatment and Manipulation of 18/8. By L. Sanderson 11–12
Stress-Strain Diagram for Mild Steel, The. By G. Welter and S. Gockowski 13–17
Some "Rare" Elements 17–18
Steel Corrosion, Oxygen Pressure Related to..... 18
South Durham Iron and Steelworks, Improvements at.....26–30
Steelmaking in Great Britain ...33–37
Some Fundamental Factors Regarding the Stress-Strain Diagram of Mild Steel. By G. Welter and S. Gockowski 61–64
Steel, Causes of Porosity in Electro-Deposited Nickel on 83
Some Contributions of Metallurgy to Engineering Progress.....91–94
Some Recent Developments in the Iron and Steel Industry in Britain. By A. McCance, D.Sc. and T. W. Hand 97–98
Some Fundamental Factors Regarding the Stress-Strain Diagram for Mild Steel. By G. Welter and S. Gockowski 99–101
Soviet Russia, Ferrous Metallurgy in. By a Special Correspondent 101–102
Steel Forgings, Weldless 105–106
Steel Tuber Economisers..... 106
Sulphate Pulp Mill, Corrosion Problems in the 111
Small Vertical Oil Engines, Producing 134–136
Steel, Influence of the Cooling Speed on the Transformation of 136
Steel Wires, under Varying Tensile Strength, Fatigue Testing of.... 132
Small Centrifugal Oil Purifiers..... 136
Steel, Cold-Rolling Tests on Nickel-Copper and Brass Plated 140
Stress Limits, Wire Rope. By Richard Saxton 143
Steel, Aluminium as a Surface Protection for..... 144
Steels, Effect of Carbon on the Critical Cooling Rate of High-Purity Iron-Carbon Alloys and Plain Carbon 146
Sudbury 153–160
Steel Co. of Canada, The 153–160
Some Application of High-Strength Aluminium Casting Alloys. By a Special Contributor 191–193
System for the Investigation of the Mechanical Properties of Cast Iron, A. By J. E. Hurst....197–200
Structures, Reducing Corrosion and Erosion in River 215–216

T

Time Study to Rolling Mills, The Application of 31–32
Tube Economisers, Steel 106
Transformation of Steel, Influence of the Cooling Speed on the..... 136
Testing of Steel Wires under Varying Tensile Strength, Fatigue 132

Page

Technical Information on Tin 136
Toronto 153–160
Timken Roller Bearing Co., The 163–183
Temperature, the Measurement of. By E. C. Rollason, M.Sc. ..203–205
